## Quick Reference Troubleshooting for Goblins DOS CD

**Problem:** If you are experiencing Intermittent Lockups/Freezing (CD)

Solution: Change the CD-ROM driver from MTMCDAE.SYS to

MTMCDAS.SYS.

Problem: If you are experiencing No sound effects

**Solution:** This usually happens when using a Pro Audio Spectrum card. To solve this, re-run the installation program and choose Sound Blaster instead. Also try selecting NO Sounds. This is equivalent to CD Audio Out. You will still get music and sounds.

If you are using a SoundBlaster card you can try changing your IRQ to 3, 5, or 7. If you continue to experience problems Try selecting No Sounds. This is equivalent to CD Audio Out. You will still get music and sounds. We have also included the patch GOB 1 CD if you continue to experience further sound problems.
